## APPLICATION FOR POSITION

### Front End developer Workplace/Company

Kosovo, Prishtina

## COMAPNY PROJECTS

DSOA Chatbot - Developed a multilingual chatbot interface for a website using React, SCSS, and Redux for state management. Connected the UI to a .NET API and implemented i18n for seamless language support, enhancing user engagement and communication with the bot.

Pygmalion Be (React Js App) - The Pygmalion project was an e-commerce platform with a webshop and ERP for a home decor company, built using React.js, React Query, React Router, Zustand, and Material UI. My role involved developing the UI and integrating it with the API. Key webshop features included user authentication, profiles, product listings, a blog, and Stripe payments. The ERP enabled product, blog, and user management. This project provided both a seamless shopping experience for customers and efficient tools for business operations.

Morel Opticien (Next.js App) – As a Frontend Developer, I built a dual-purpose platform combining an e-commerce webshop and ERP dashboard for an optical company in Belgium. Using Next.js, I developed a responsive UI with user authentication, profile management, product catalog, blog, and Stripe integration. I also created an ERP system for managing products, prescriptions, users, POS, and more. I used React Query for data fetching, Zustand for state management, Tailwind CSS for styling, and ShadCN for UI components to deliver a cohesive and scalable front-end experience.

Blackstone Website - redesigning of company website modules and added new features. Technologies that used: Html/Css, Javascript, Bootstrap.

CNW Gmbh - Developed and designed a modern, responsive, and user-friendly company website for CNW GmbH, an IT services provider, using WordPress as the CMS and Elementor as the primary page builder.

## EDUCATION

### University for bussines and technology Bachelor of computer science

2015 - 2018

Kosovo, Prishtine

## SKILLS

Javascript
