SUMMARY

Motivated and detail-oriented Front-End Developer with strong experience in React, Next.js, and WordPress. Passionate about building responsive, user-friendly websites and continuously expanding my knowledge of the latest web technologies to deliver exceptional digital experiences

WORK EXPERIENCE

Front End Developer, *Freelance Contractor* 07/2025 | Remote
Threecolts – Blog Platform & Company Website

- Developed and maintained the Threecolts blog using WordPress, including custom features and theme customizations
- Redesigned and expanded the Threecolts company website with SvelteKit and Tailwind CSS, building new pages and reusable UI components
- Improved UI/UX and responsive design across both platforms to ensure consistent branding and a smooth experience on all devices
- Managed regular WordPress core, theme, and plugin updates, ensuring site stability, security, and compatibility
- Implemented SEO best practices on the blog, including on-page optimization, metadata, clean URLs, and schema markup

Tech Stack: SvelteKit, Tailwind CSS, WordPress, SCSS, ACF

Front End Developer, *Innovative Solutions* 01/2023
Pygmalion Be

- Developed and maintained a responsive UI for an e-commerce platform and ERP system using React.js, React Query, React Router, and Material UI.

- Integrated webshop features, including user authentication, profile management, product listings, blog functionality, and Stripe payments for secure transactions.
- Designed and implemented the ERP system for efficient product, blog, and user management, streamlining business operations.
- Ensured seamless communication between front-end and back-end by integrating with the API for dynamic data exchange.

Tech stack: *React Js, REST APIs, Material UI, Tailwindcss, Zustand, React Query*

Morel Opticien
- Built a dual-purpose platform combining an e-commerce webshop and ERP dashboard for a Belgian optical company using Next.js.
- Developed a user-friendly interface with features such as user authentication, profile management, product catalog, and Stripe payment integration.
- Created an ERP system to manage products, prescriptions, users, and POS, enhancing operational efficiency.
- Utilized React Query for efficient data fetching and Zustand for state management, delivering a high-performance and scalable front-end.

Tech stack: *Next Js, REST APIs, Shadcn, Tailwindcss, Zustand, React Query*

Front-End Developer | WordPress CNW GmbH (Colnetworks GmbH) | *01/2021 – 12/2021*
- Designed and developed a modern, responsive company **website** using WordPress
- Built flexible page layouts with Elementor for efficient content management
- Ensured cross-browser and cross-device compatibility across desktop and mobile
- Applied UI/UX best practices to improve usability and user engagement
- Delivered a scalable web solution aligned with company branding and business goals

Tech Stack: WordPress, HTML, CSS, PHP, ACF, Elementor

Front End Developer, *Blackstone Eit* 02/2019 – 05/2021

Blackstone Website
- Redesigned key modules of the company website to enhance visual appeal, usability, and overall user experience.
- Added new interactive features using HTML, CSS, JavaScript, and Bootstrap to modernize the interface.
- Ensured responsive design and improved accessibility across devices and screen sizes.
- Contributed to a more professional and engaging digital presence aligned with brand identity.

DSOA Chatbot (Multilingual Web Chat Interface)
- Developed a multilingual chatbot interface using React, SCSS, and Redux for efficient state management.
- Integrated the front-end with a .NET API to enable real-time communication and dynamic bot responses.
- Implemented internationalization (i18n) to support multiple languages, improving accessibility and user engagement.
- Delivered an interactive, responsive, and accessible chatbot experience, enhancing communication with end users.
